CAREER SUMMARY

Python Full Stack Developer with expertise in building scalable web applications using **Python**, **Django (DRF)**, and **React.js**. Experienced in developing robust backend APIs and responsive frontend interfaces. Passionate about creating seamless user experiences and delivering practical solutions in dynamic team environments.

TECHNICAL SKILLS

- **Backend:** Python, Django, Django Rest Framework
- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Axios
- **Database:** PostgreSQL, SQLite
- **Version Control:** Git, GitHub
- **Payment Integration:** PayPal API, RESTful APIs
- **Tools & DevOps:** Docker (basic)

TRAINING / INTERNSHIP

Python Full-Stack Trainee — CB Tech, Kadavanthra

Nov 2024 – May 2025 (6 months)

- Completed Python Full Stack Course (Grade A, 4 months) and 6-month practical training.
- Built **REST APIs** with **Django DRF**, developed responsive UIs with **React.js**, and integrated PayPal payments.
- Worked with **PostgreSQL/SQLite** and used **Git/GitHub** for version control.
- Delivered documented features and demo projects during training evaluation.

PROJECTS

Stock Prediction Portal

- Developed a stock prediction web app with backend API for ML-based forecasts.
- Designed React dashboard with charts/tables for visualization of predictions and historical data.
- Implemented real-time data updates and interactive UI for better user experience.
- Focused on data handling, API integration, and frontend visualization.

Multi-Vendor E-Com Website

- Built vendor registration, product CRUD, and order management APIs with DRF.
- Implemented role-based access control (RBAC) for vendors, buyers, and admins.
- Integrated frontend with backend APIs; added search, filters, and responsive design.
- Strengthened project with Git/GitHub workflow and modular code structure.

Hospital Management Website

Modules: patient registration, appointments, and reporting.

EDUCATION & CERTIFICATIONS

- **B.A. English Literature** — Emmanuel College, Vazhichal (2020 – 2023)
- **Python Full-Stack Trainee** — CB Tech, Kadavanthra (6-month internship, Nov 2024 – May 2025)
- **Certificate in Stock Prediction Portal** (Machine Learning & Web Integration) — Udemy (2025)
