CAREER SUMMARY

Python Full Stack Developer with expertise in building scalable web applications using **Python**, **Django (DRF)**, and **React.js**. Experienced in developing robust backend APIs and responsive frontend interfaces. Passionate about creating seamless user experiences and delivering practical solutions in dynamic team environments.

TECHNICAL SKILLS

- **Backend:** Python, Django, Django REST Framework
- **Frontend:** React, JavaScript, HTML5, CSS3, Tailwind CSS
- **Database:** PostgreSQL, SQLite
- **Tools & DevOps:** Git, GitHub
- **Payment Integration:** PayPal API (via RESTful APIs)

SOFT SKILLS

- Problem Solving
- Communication
- Time Management

TRAINING / INTERNSHIP

Python Full-Stack Trainee — CB Tech, Kadavanthra (Nov 2024 – May 2025)

- Completed 6-month training with hands-on projects; graded A in course completion
- Delivered documented features and demo projects evaluated by trainers.

PROJECTS

Multi-Vendor E-Com Website

- Built a multi-vendor ecommerce platform with vendor dashboards, role-based access, and PayPal payment integration.
- Implemented advanced product management, order lifecycle, and scalable database design.

Stock Prediction Portal

- Created an AI-powered stock prediction system using LSTM (Keras/TensorFlow) and real-time Yahoo Finance API data.
- Designed secure frontend dashboards with React.js for interactive charts and technical indicators.

Hospital Management system

- Built a hospital management platform with JWT-based role access for doctors, patients, and receptionists.
- Implemented multi-step appointment booking, automated profile creation (Django signals), and intuitive dashboards.

EDUCATION & CERTIFICATIONS

- **B.A. English Literature** — Emmanuel College, Vazhichal (2020 – 2023)
- **Certificate: Python Full-Stack Development** — CB Tech, Kadavanthra (2025)
- **Certificate: Stock Prediction Portal (Machine Learning & Web Integration)** — Udemy (2025)
